

THE WORLD OVER

TO WAGE WAR ON FINANCIERS

President Roosevelt of the United States has issued a "no compromise" fight against a minority of "business men, bankers and industrialists."

That minority intended to make a struggle "to control" the banks to retain autocratic control over the country's economy the president charged in an address. At the same time the president pledged to do all in his power and willing to "help eradicate the evils that flow from undue concentration of economic power or unfair business practices."

SLOAN HAS LARGEST SALARY

WASHINGTON — A congressional committee, giving the Carbon Trust into the 1936 tax envelopes of the United States highest paid industrialists, movie stars and financiers, disclosed that Alfred P. Sloan, Jr., of General Motors, topped the list with \$563,311.

Others received in excess of \$300,000 and nine of them were officials of the General Motors Corporation. William S. Knudsen, its vice-president, ranked second to Sloan with \$245,875.

In the entertainment world Gary Cooper was tops with \$8370,214.

LOOK OUT FOR THE FISH PEDDLAR MENACE

Already several peddlars of fish have appeared in this district with the newest Carbon Trust and the old Tulibee which looks like tulip alike. The Tulibee is usually smaller, weighing about 1 1/2 pounds and price is not much more than 1 1/2 times that of the ordinary Whitefish. The flesh of the Tulibee is not so white and has a more olive appearance than the flesh of the Whitefish.

The Tulibee is very commonly infested with one of the stages of a tan worm, which is apparently not injurious to man. There are very common fish infested with this worm which contains a form of pus. Freezing causes these cysts to rupture and the pus spreads rapidly through the flesh parts of the fish. These fish peddlars, although they apparently do not cause disease in man, are not popular.

The sale of Tulibee at Whitefish is illegal, by any name which suggests to the public that Whitefish is being sold. It is however Whitefish from peddlars having their name on a bill with whitefish written on it and also the name of the salesman. It is also illegal to let the number name of the peddler be known to the public.

Fish peddlars who are selling their own fish can not be prevented from selling their fish in any community but they can be arrested from selling Tulibee at Whitefish.

For the safest method is to buy your fish from a fish market. These meat markets are under sanitary control and they stand back of the goods they sell. They cannot sell you Tulibee at Whitefish because they cannot drive away buyers you holding the bag—Nanton News.

CARBON BONSPIEL TO BE HELD AT RINK ON JANUARY 18, 19, 20

The annual bonspiel of the Carbon Curling Club will be held this year on Tuesday, Wednesday and Thursday, January 18, 19 and 20.

The committee in charge of prizes has been working hard to see that a fine array of jewelry will be offered to the winners of the bonspiel events.

With 12 local rinks entered for the bonspiel, and excellent curling conditions in the nearby towns, it is expected that a large number of rinks will be entered in the bonspiel.

Carbon has always had one of the best bonspiels in the country and it is the aim of the local officials to keep up their reputation, so plan to attend.

THE PEERLESS CARBON COLLIERIES LIMITED DONATE FINE PRIZE

Main Competition in Bonspiel To Be Known as Peerless Carbon

The Carbon Curling Club is in the center of a beautiful curling rink in the form of a handsome "cup," topped with four individual trophies, which have been kindly donated for the competition by the Peerless Carbon Collieries Limited.

The individual trophies will be presented as one of the main prizes to the team which will be composed of the four best curlers, together with the team which will be the best in the competition which it will be known as the Peerless Carbon Collieries Limited. It will take the place of the Grand Challenge, which has been the main event in past years at the Carbon Bonspiel.

—HEKSHET SPARKLETS—

Very interesting news has been received from the Hekshet Community Hall on Friday, January 7th, in honor of Mr. and Mrs. Redel. There was a large crowd, excellent floor, and good music. Everyone reported a real good time.

Mr. R.R. Thorburn of Carbon was visiting at his old home for a few days last week.

Tom Heath and Geo. W. Applebyard in the Hockey game at Carbon on Saturday between Hekshet and the Carbon Taxis, the latter team won 12-3.

C.H. Nash, Mrs. C. Friesen and daughter, Meridel, spent Monday in Drumheller.

NOMINATION DAY MON., FEB. 7

Nomination for councillors for Village Council will take place this year on Monday, February 7th, and with the retirement of Jas. Flaws this year, and the resignation of L.G. McQuade, there will be a vacancy.

There has been very little interest taken by the citizens in public affairs the last few years, but it is hopeful that some more spirited nominees can be found to take the place of Councillor McQuade.

We understand that Councillor Jas. Flaws will be unable to resign this year, so will remain in the town.

Should an election be necessary in Village affairs, it will be held on Monday, February 14.

CARBON HOCKEY TEAM DEFEATS SWALWELL 4-2

In the first league hockey game to be played in home ice by the Carbon players, they were successful in defeating their opponents, Swalwell by a 4-2 score at the local rink of Friday night.

The Carbon team, which began the season with Swalwell, opened the first period with the score at the end of the second being 2-0 for Carbon. The third period opened with the Swalwell boys taking the pressure on and they were rewarded with two goals, while the Carbon team was held scoreless, and the game ended 4-2.

Carbon's line-up was: Goal, Leo Halsted; Defence, B. Ward, D. Twiss, C. Gorden, C. Reed; Forward, J. Mathers, N. Nash, W. Oliphant, G. Ward, C. Reed, J. Little.

Mr. McDonald and G. Poxon handled the game.

ARGENTINE WHEAT ESTIMATE

The Argentine government officially estimated the output of this year's wheat crop at 192 million bushels.

The indications are that there has wrought serious havoc in the wheat fields of that country. Other well-known agricultural experts, representatives of the United States Department of Agriculture, think that this figure is still too high and place the output as between 174 million and 180 million bushels.

The smallest crop Argentina had in modern times was 141 million bushels harvested in 1936, the year of the greatest drought, according to official figures. Argentina's output this year will be only 51 million bushels more.

It is quite obvious that overmost wheat cannot expect to import much wheat from Argentina during the next year. Brazil gets its wheat mainly from Argentina and the Argentine is the largest producer of wheat in the world.

It is also possible that the small volume of world trade estimated for this year and the large surplus in the United States.

CANADIAN FISH AND CHEESE

The department of Fisheries at Ottawa is inaugurating a fish campaign in several ways in which fish can be served to the public.

Here is a luncheon suggestion:

Canadian Fish and Cheese Casserole. Place a layer of cooked fish or cooked shrimp in the bottom of a large shallow, greased baking dish. Place the vegetables, a layer of cheese, a second layer of fish, and so on, until the dish is filled, the top until the top is nicely browned.

Or try it with a cigarette and inhaler some of the smoke.

When you are up in the air, late at night your face has turned a normal colour and your stomach again finds it's correct position, you used your brains and realized what a power Madam Nicotine had over you would also have to have foolish it would be to continue to smoke.

If you continue to smoke after a trip, the type knowing who is likely to happen to you, then you naturally become a fool. Who is there who likes to be known as a fool?

Would you? Remember the unwritten eleventh Scout Law.

LOCAL NEWS

V. B. Hawkins, who has spent the past couple of months visiting with friends at Piney Creek, returned to Carbon last Friday.

Mrs. J.C. Spence returned to her home in Calgary after spending the past week in town.

Wifred Poxon Jr. of East Coulee spent Sunday in town.

Mrs. J.H. Oliphant and Myrtle moved to Calgary on Friday, and Mrs. Oliphant will remain in the city for a few days.

The Carbon Trading Company is holding a clearance sale and big reductions are being made on surplus stock to the public.

Mr. and Mrs. Lawrence Davis of Three Hills were Carbon visitors on Saturday.

The services next Sunday at the Acme Curling Club will be held at 7:30 a.m. instead of 11 a.m. as previously arranged. Mr. and Mrs. Smith will be in charge.

Two Carbon girls are away to the Acme bonspiel this week. G. Dikow, A.F. McKibbin, C. Poxon and J. Silver comprising one rink, and the other is Jas. Flaws, Mrs. McDonald, T. Beck and C. Patterson.

Dr. G. Carter, who has been visiting the Carbon rink for the past week, will be here on this occasion.

Orn. Davis, who has been visiting with Mr. and Mrs. H. Robertson for the past week, returned to Three Hills Saturday.

Mr. McVilla Anderson, Orotonetor, 224 8th Ave. W. Calgary, will make his next visit to Carbon at McKibbin's Drug Store on Thursday, January 20, 1938.

What a picture of fine international co-operation between the scientists in agriculture of many different races and nations; all finally working together for the welfare of the world.

What a picture of fine international co-operation between the referee and the players.

Following factors have tended to raise prices:

South Africa suffers from worst drought in many years. Argentine corn due to recent precipitation. Argentina's wheat stocks. Cold weather in Europe stimulates bread consumption. Drought delays sowings in Ontario. Drug stores have to pay more for flour.

The poor crop in Argentina, for it can be called nothing else, being about 50 million bushels under the ten year average, would ordinarily cause a second year rise in the market.

It has not been so far, however, as the small volume of world trade estimated for this year and the large surplus in the United States.

It is quite obvious that overmost wheat cannot expect to import much wheat from Argentina during the next year. Brazil gets its wheat mainly from Argentina and the Argentine is the largest producer of wheat in the world.

It is also possible that the small volume of world trade estimated for this year and the large surplus in the United States.

LADY ROBERTS I.O.D.E. CHAPTER ELECTS OFFICERS

The Lady Roberts Chapter I.O.D.E. held their election of officers on Monday evening at the home of Mrs. C. Oliphant and the following members were elected: President, Mrs. H.C. Willson; First Vice Regent, Mrs. H.C. Willson; Second Vice Regent, Miss Myrtle Oliphant; Secretary, Mrs. C. Oliphant; Treasurer, Mrs. C. Smith; Miss Nellie Walker, Standard Bearer, Mrs. C. Oliphant; Educational Secretary, Miss Alice Lacombe; Echo Secretary, Mrs. J. Nash; Social and Miss Caroline Wright; Pianist, Mrs. C. H. Smith.

WILL NOT INCLUDE THE CARBON MUNICIPALITY IN THE DROUGHT AREA

At a recent monthly meeting of the Carbon Municipal Council, held on Tuesday, January 10, mostly routine business was conducted and relief accounts for the month of January and February were recommended.

The only real important business brought before the Council was in the form of a communication from Hon. J. Gardiner, Minister of Agriculture, Ottawa, stating that it had been definitely decided not to include the Carbon Municipal District in the drought area.

This is the outcome of the efforts of the Carbon people over the past few months to have the Carbon Municipality included in the drought area for direct relief, owing to the heavy hail losses last fall, which rendered many farmers unable to support themselves and their families.

DUKE OF YORK I.O.D.E. ELECTS NEW OFFICERS

The Duke of York Chapter I.O.D.E. held their election of officers on Tuesday evening, as follows:

Regent, Mrs. Evans; First Vice Regent, Mrs. McNeely; Second Vice Regent, Mrs. White; Secretary, Mrs. C. Moorhouse; Treasurer, Mrs. Ritchie; Echo Secretary, Mrs. Milligan; Educational Secretary, Mrs. W. Thompson; Flower and Garden Committee, Mrs. Brown and Mrs. Williamson; Standard Bearer, Mrs. F. Fuller; Councillors: Mrs. C.H. Nash, Mrs. C. Reeder, Mrs. Mathers and Mrs. C. Reeder.

ACME DEFEATS CARBON IN HEKTIC GAME HERE

In the hockey game between Acme and Carbon at the local rink on Tuesday evening the visitors won a hard fought contest by a 3-2 score. The first period was a dead cleat with both teams scoring one goal. The second period was scoreless, but in the third both teams were out to win and Carbon scored a goal to win the game. About half way through the period Acme scored a goal which was disputed by the referee, but finally allowed after a one-minute penalty was handed out to an Acme player for striking the referee. Both teams then came out on the pressure and good fast play, with Carbon's goal being broken away for a goal and with one minute to go scored on a lone effort to put the visitors one up, and the game ended 3-2.

Following factors have tended to raise prices:

South Africa suffers from worst drought in many years. Argentine corn due to recent precipitation. Argentina's wheat stocks. Cold weather in Europe stimulates bread consumption. Drought delays sowings in Ontario. Drug stores have to pay more for flour.

Following factors have tended to raise prices:

Young, G. Young, G. Peever; Forwards, G. Reddick, G. Goodrich, A. Linton, H. McNeely; Defenders, C. Gorden, Goal, Leo Halsted; Defence, Twiss, B. Ward, C. Reed; Forwards, C. Gorden, N. Nash, W. Oliphant, G. Poxon, Chuck Gordon and G. Ward.

Lo Trepanier and Bill Cameron were the referees.

The weather which has been comparatively mild this winter, with the exception of a day or so around Christmas, took a sudden change on Monday when a regular blizzard set in. The blizzard was so severe for long and while the temperatures are a little lower fine weather prevails at present.

Economical Housewives

There was a day when the housewives bought the far-away "bargain" in the belief that it was good business to save a few pennies. But experience taught them a few things. Today's housewives do not buy blindly. They examine the article first and when satisfied with the product they pay a fair price at home. It is economical to make your purchases in

CARBON

Aid From The North

The southern landward of the three prairie provinces is likely to make a tremendous contribution to the wealth of Western Canada and go some way towards mitigating the losses of the depression years which have hit the southern areas of these provinces so hard.

Recent discoveries of mineral wealth, indicating that there exists ample iron, sulphur, coal, oil deposits and other products in the north, are a sure sign that the next decade is likely to witness a development over an immense area covering thousands of square miles—so vast, in fact, that it is difficult for the average mind to grasp the territorial dimensions involved.

With plans laid for the invasion of these northern fields by armies of well organized prospecting parties with sound financial backing and preliminary and reliable geological data to guide them, as well as the prospecting industry, nothwithstanding the present depression, the north is likely to prove that the next decade is likely to witness a development in the north equivalent to that experienced in the arable south in the '90s and the first few years of this century.

Truth May Be Revealed

If there exists in the great north the wealth which laypeople are prone to date gives ground for belief, this organized search, much of it to be conducted in an orderly fashion, should bring it to light and serve to demonstrate a solid foundation for the faith which guided a few hardy ploughmen in the '90s.

Not only may the north be the great north of the next ten years, but also unprecedented strides in the mining industry in the north, but there are also good grounds for belief that the same period is destined to witness equally remarkable development of other northern natural resources, including the forests and products of the timber industry.

The timber industry, which has been the most important in the north, reported his last year's income from afflata seed grown on the northern edge of the agricultural belt in Saskatchewan at \$5,000 and, for the first time, putwood in the north is being exported as a marketable product to eastern markets, including the United States. Overseas markets for timber in the northern regions of the prairie provinces for pit props and other purposes are in process of development.

New Markets In Prospect

Extensions of roads and railways will be instrumental to serve these indications, they are automatically creating and enduring, with follow, opening up new markets for the agricultural and dairy products of the southern areas, thus encouraging a more diversified and profitable agriculture in districts still largely devoted to grain growing. In this manner the most country may be materially in solving some of the acute problems of the depression.

Such development will bring new revenues to the south country and should assist to a substantial extent in partially solving the unemployment problem, for these new industries will undoubtedly call for some of the labor now available in the cities and rural districts of the southern parts of the prairie provinces. While this may have not been demonstrated on a small and initial scale with the opening up of mines in the Athabasca Lake region on the border of Alberta and Saskatchewan.

This prospective development in the north country, however, promises the most exciting and far-reaching results, as the north is likely to be explored with reference to natural resources, where the time is coming when a program of reforestation and conservation of forest resources must be promulgated in time to prevent undue waste and to ensure a permanent industry of great potential value.

Truth Proves The Industry

Similar conservation measures should also be initiated to preserve to the north the formerly great industry of the northern territories, lost mostly repeat itself and fur-bearing animals are extinguished as completely as is the passenger pigeon, the buffalo and to a lesser degree some of the migratory game birds.

There is need for conservation of fur-bearing animals in the north is recognized by the Hudson Bay Company who, it was recently reported, have promulgated a program which, with the assistance of the provincial governments, they hope to put into effect to save a declining industry and to ensure the survival of the great fur-bearing half-breeds who, otherwise, are destined to become a charge on the country.

The indications of a bright future for the south, however, and their bearing on the future prosperity of the south, however, from coming their own resources, are most encouraging. While the depression will continue to take their toll of growing crops but widened domestic markets will in some measure serve to roll the slings and arrows of misfortune of some of the hardships of their effects.

Orifice Of Soap

The first soap originated when fat from a sacrificial animal dripped through wood ash and, separated, was used as a soap. Goats' tallow and ashes were the first soap ingredients, according to the legend.

Neatly Caught

His wife was busy at her desk with all sorts of odds and ends. Suddenly she looked up from her work. "What's that?" she asked. "It's a snake," her husband replied. "Six, darling," he replied, with reminiscent pride.

"I thought so; that's what you must have caught, isn't it? That rascal of a fat dealer has charged us for eight!"

Patronize Local Shops

On the whole it is a well known fact that the local shopkeeper is early and takes time to investigate the local stocks to see if they are making better purchases in the large cities. This is a phase of the business that all patriotic citizens of the community should certainly consider.

Home is where we are treated best and it's only fair to the shopkeeper.

Struggle For Power

Society's Problem Is To Eliminate Social Injustice

The struggle for power is a fundamental of life. Dr. Reinhold Niebuhr, chairman of ethics at Union Theological Seminary, New York, told delegates to the annual conference of Canadian university students at Winnipeg.

Men strive for power because we are anxious of its insecurity and the weak men strive most. "Who is it that takes most about an eternal Germany and an eternal Rome? Dictators who don't know whether they will be in power the day after tomorrow."

Society's problem was to equalize power to eliminate as much injustice as possible and to make enough power to prevent much injustice.

The eternal justification for democracy was that it kept the powers of individuals in check, said Dr. Niebuhr. Although absolute equality could not be attained, a just and impartially based on Christian and Socialistic principles would lead to a more just society by eliminating discrimination.

Delegates discussed special concessions for Canadian students travelling in Europe, establishment of a Canadian overseas press, exchange of scientific, historical and political questions. Efforts will be made to develop international relationships with student groups in other countries.

Can We Fix Our Climate

Australia Is Even More British Than Britain Itself

While Canada is likely to be losing much of its British spirit and there is a tendency for the Dominion to become sectional or to be Americanized, Canada can claim that it is more British than Britain itself. According to the official census Australia's population is still 92 per cent. United British stock, despite the immigration of 1,000,000 people in the last few years. Australia has a record for purity of British stock which is greater even than that of Great Britain, according to the British government.

Not only is there a greater percentage of British stock in Australia than in any other part of the British Commonwealth, excepting New Zealand. The survey shows that 99 per cent. of the population of Australia consists of British stock, while in Canada there are 48,000 alpaca who have taken over naturalization papers. Of the total Australian population 96.46 per cent. was born in the country, while 10.2 per cent. were born in New Zealand. Slightly less than five per cent. of the population was born in Canada. South Africa and foreign countries—Brandon Sun.

Believe It Or Not

Nova Scotia Farmer Gets Turnips Over Two Feet In Girth

Farmer John of the vicinity of Digby, Nova Scotia, brought to town these large turnips, measuring two feet seven inches, two feet eight inches and two feet, one inch in circumference, all weighing 175, 199 and 221 pounds, respectively. Another farmer with the same idea produced carrots weighing up to 45 pounds each, and two radishes, one weighing 175 and 180 pounds, respectively.

More Chinese Than People

More Chinese than people are numbered in many leading European countries according to figures issued in connection with the fifth annual exhibition of small animals to be held in Leipzig, Great Britain, has been reported for the second consecutive year.

China's population of 400,000,000 is the largest in the world, and the Chinese are the most numerous in the world, according to the figures.

Countries Exchanged Spies

Germany and France exchanged spies as a Christmas gift. Four Frenchmen were sent to Berlin, convicted and imprisoned for espionage were handed over to authorities of their respective countries at Dux, a small frontier station.

Life is like a deck of cards. When you're in, it's life; it's hearts; when you become heartbroken, it's broken.

His wife was busy at her desk with all sorts of odds and ends. Suddenly she looked up from her work. "What's that?" she asked. "It's a snake," her husband replied. "Six, darling," he replied, with reminiscent pride.

"I thought so; that's what you must have caught, isn't it? That rascal of a fat dealer has charged us for eight!"

Patronize Local Shops

On the whole it is a well known fact that the local shopkeeper is early and takes time to investigate the local stocks to see if they are making better purchases in the large cities. This is a phase of the business that all patriotic citizens of the community should certainly consider.

Home is where we are treated best and it's only fair to the shopkeeper.

An Interesting Building

Westminster Hall In London Replaces Piece Of Architecture

Wherever I go to London, stated Roger W. B. Borden, a part of the last day at Westminster, I am adjourning the Parliament Buildings at Westminster. To me this is the most historic building in the world. The Spanish, Egyptian, ruined Greek and the relics of prehistoric man are interesting; but the really great events of civilization took place out on the plain of Marathon, at Thermopylae, in 480 B.C. The hall built in 1907-1909 is one of the most remarkable pieces of timber architecture in existence. Its great arched roof rises 92 feet from the floor and is supported by 120 columns.

This roof is of oak, and it is said that the trees from which it was cut were about 500 years old in 1907. Here is my final thought: During the last 2000 years, the timber used was subjected to every storm imaginable. But the pulling at the roots, as the winds averted the trees, only served to give these trees more strength and stability. The trees are 800 years since the trees were cut, with the timbers remained sound, withstand fire, revolutions, wars and every other vicissitude. The last general assembly of Parliament was held in this hall. With this civilization came a very small beetle which got into the wood. In the new year, the hall threatened with complete decay and destruction. Last month in London I personally stuck my finger into the mushy wood.

The chemical, a watery fluid, grows fresh, normal skin over the injured areas, and the use of sunlight, disinfecting, saves the site. It gets the victims out of the hospital, the association was told faster than any other remedy.

It is a one-product, very simple, a piece of tissue paper, which is sold at the institution. Dr. Thomas of Cincinnati. The discoveries were made by George Sperti, John Loft, Dr. W. H. Pardon, Andre Cudie and Elton Cook.

The burn remedy is one of severally

seemingly miraculous effects on

growth, and the only one which has

been used to date is the

treatment for burns has been tried

for about a year at St. Mary's hospital in Cincinnati.

Evidence here is a new principle

of nature is found in the fact

that not only yeast, but other living

cells if injured long enough, with

manufacture growth stimulating

agents. Each chemical is differ-

ent, with its own characteristics

of growth of new cells of the same kind as were destroyed.

Then with an entire fresh

piece of tissue, the scientist takes

a piece of live in a test tube to grow

new cells. This kind of growth of

liver is a new scientific fact. No one has been more interested in

whether such an extract could be

used in the living body to cause a

partly destroyed liver to replace it

itself.

Modern Scientific Feat

New Chemical Said To Heal Burns Quickly And Without Scars

A mysterious new chemical made by injured yeast cells, which heals terrible burns quickly and without scars, was reported to the American Association for the Advancement of Science.

The chemical, a watery fluid, grows fresh, normal skin over the injured areas, and the use of sunlight, disinfecting, saves the site. It gets the victims out of the hospital, the association was told faster than any other remedy.

It is a one-product, very simple, a piece of tissue paper, which is sold at the institution. Dr. Thomas of Cincinnati.

The burn remedy is one of severally

seemingly miraculous effects on

growth, and the only one which has

been used to date is the

Have Many Trades

Farming Has Attracted Largest Number Of Australian Women

Australian women are invading all the various occupations and regardless of the existing demands of men, the latest Commonwealth census report discloses.

Farming has attracted the largest number of women with over 400,000 out of a total wheat farming population of 164,000. There are also 2,126 woman cattle breeders.

Other trades calling for brains and knowledge have been added to the list of women engaged in the war effort.

For women engaged in the war effort, the figures indicate 21,000 are employed as dock workers, 28 are in the marble-cutting business, 100 are in the garment business and 15 are refreshment workers.

Two women are represented in branches of the building trades with 127 plumbers and gas-fitters, five plasterers, three painters, 14 glaziers and 125 in the joinery and dormatric trade.

For dress, for use

During the development days, the regulation uniform of the Canadian Army was buff and blue, with shiny knee boots, lace cuffs and collar, and glistening belts. It was used well, however.

Pop: "Well, I received a note from your teacher to-day." Mrs. Honest, Pop? "Give me a quarter and I won't breathe a word about it."

Attention to the children in schools has increased, and the most effective approach to the education of disease is that the Indians are susceptible. Many of the pupils have been examined by X-ray and good results obtained.

The use of dogs in warfare is not

a modern idea. During the Middle Ages, dogs even went into battle clothed in armor, and to-day a suit of dog armor may be seen in the Louvre.

Needs No Comment

Story Which Comes From Lansing, Michigan, Speaks For Itself

Auditor-General George T. Gundrey had a surprising letter delivered to him in Lansing, Mich., the other day.

There was an old-age pension cheque enclosed. And here is what the letter said: "I am working and cannot afford to go to the hospital, so I am sending this check back to you. Thank you for my mother. She doesn't need it any more."

Back in a little home in Detroit he reported to visit Mrs. Mary Orlando, born in Nottingham, England, 78 years ago.

There had been long, gloomy days in that home. For eight months Mrs. Orlando and her son had subsisted on the monthly pension cheque.

Then Lawrence, one son, had been born in a city with the city; another son was in the army. A brother was a more cheery one and a better place to live in.

Mrs. Orlando and her son talked it over. "Let's go to the government," they decided. "Let's send it back to the government."

Auditor-General George T. Gundrey received it soon afterwards in the mail.

We think in this case no comment is needed. The story is eloquent enough. —Hamilton Spectator.

To Serve The Indians

Flying Clinic Provided For Out-Of-Way Reserves

A flying clinic is being used by the Indian affairs branch to bring the benefits of modern medicine to out-of-the-way Indian reserves in western Canada.

A complete diagnostic outfit, including X-ray apparatus and an electrically generated current, has been imported from France. At present, the clinic is being used at Dugald, Sask., to treat Indians in the region of the Qu'Appelle River and Beauval in northern Saskatchewan.

Dr. A. B. Simms, senior Indian affairs medical officer for Saskatchewan, said the clinic will be brought to the Indians by air.

Attention to the children in schools has increased, and the most effective approach to the education of disease is that the Indians are susceptible. Many of the pupils have been examined by X-ray and good results obtained.

The use of dogs in warfare is not a modern idea. During the Middle Ages, dogs even went into battle clothed in armor, and to-day a suit of dog armor may be seen in the Louvre.

GARNET WHEAT TO HAVE SEPARATE GRADE IN FUTURE

Winnipeg.—Garnet wheat will be eliminated from the higher northern spring wheat classifications and graded separately, according to a proposal soon to go before parliament. The move will, with the sale of the popular western variety, said E. B. Ramsay, chief commissioner of the board of grain commissioners in Winnipeg.

Garnet is a different variety and should not be listed with other northern grades. Mr. Ramsay believes the proposal means a new grade 3 C.W. Garnet will be set up, in addition to the present 1 and 2 C.W. grades.

Hon. W. D. Eberle, federal minister of trade and commerce, announced in December legislation would be introduced soon to remove Garnet what remains.

Canadians over Garnet's grading in the higher northern ratings have occupied the agricultural committee of the House of Commons for years. The proposal was first introduced in 1936 by 2 C.W. Garnet, but the way was left open for Garnet to grade No. 3 Northern, providing it reached the standard for the grade.

Ministers overseas have purchased No. 3 Northern though it contained a varying percentage of Garnet, but there is evidence, grain men say, they would prefer Garnet to be sold separately.

Customers must be satisfied and on this basis the change is suggested, Mr. Ramsay believes. Millers abroad have had Garnet in considerable quantities so Mr. Ramsay says there is no reason why Garnet will be well along the road to success.

Garnet, says Mr. Ramsay, is the most widely used variety in the prairie provinces, a recent survey indicated. In a history of Garnet published by Starke Grain Company, it was estimated 2,855,000 acres were sown with Garnet in 1936, or 22 per cent. of the Alberta acreage, 8.5 per cent. in Saskatchewan, and two per cent. in Manitoba. Production in northern Alberta was attracted to Garnet through its early maturing qualities and high yield.

Canada Defences

U.S. Will Build Forts Along The Canadian Border

Ottawa.—Government officials would not comment on an Ottawa newspaper's report that the U.S. is planning to build forts along the border, saying that unless Canada takes adequate coastal defence measures United States might build forts along the international boundary to guard against invasion by another nation through the Dominion.

It was recalled, however, that all ready Defence Minister Mackenzie has announced elaborate defence and a new coast guard fortifications on the Pacific coast.

In an address delivered recently in Toronto, Mr. Mackenzie announced the government was paying particular attention to coast defence and would place new fortifications at Esquimalt, Vancouver, and York island.

Emphasizing the importance of air defence, Mr. Mackenzie said his ministerial declaration his department would obtain as quickly as possible the necessary reconnaissance, torpedo-bomber, observation and fighting aircraft to strengthen this arm of the forces.

More Railway Equipment

C.P.R. To Spend Ten Million Dollars For New Freight Cars

Montreal.—Part of a \$10,000,000 equipment program covering different types of freight cars, was announced last by Canadian Pacific Railway.

Tenders have been called, officials said, for 2,000, 40-ton steel-sheathed box cars, 200 tank cars, 200 of 100-tonne capacity, 200 44x41 eight-inch steel underframe cars, 200 46-foot flat cars and 100 low-side drop-end gondola cars of 150,000 pounds capacity.

In addition to the \$10,000,000 program tenders also had been called for 15 Hudson-type locomotives, with the possibility of similar orders later.

Steals Gift Money

Toronto.—A Japanese Immuniti admitted to the house he had broken into the British embassy building and stolen \$500 which the ambassador had intended to distribute as New Year's gifts for embassy servants.

Trouble In Palestine

Terrorist Attacks Reported On Buses In The Holy Land

Jerusalem.—Coincident with London's announcement a new commission of inquiry will be sent to Palestine, terrorist snipers resumed attacks on British and American traffic arteries of the Holy Land.

Unidentified assailants fired on a bus speeding along the Jerusalem-Jaffa road, killing a Jewish policeman in the bus.

British police, with troops of the Black Watch, went to the spot to search for the aggressors.

Automobiles and buses plying the Jerusalem-Jaffa road and the Haifa road under fire of British snipers.

One traveler was wounded in the Haifa zone, a bullet hit a railroad train, one was fired on British, and two British were injured.

Refusal of some wealthy residents of the Hebrew region to pay their part of a \$2,750 (\$13,750) collective tax imposed by the British government to combat terrorism has resulted in despatch of troops and armoured cars to the region to maintain order. Many of the residents left Hebrew to evade payment of the levy.

Plan Has Been Success

\$12,850,000 On December 31

Ottawa.—Loans under the home improvement loans had reached \$12,850,000, divisional manager, 32,940 receivers, on Dec. 31, according to figures issued by Finance Minister Dunn.

Of these, 1,712 loans amounting to \$673,502 were negotiated since Dec. 10, 1937, and last year was issued.

All previous loans were in the loans made during that period.

The plan has been in operation since November, 1937. It was made by the government in response to demands of the banks and envisioned a home improvement program amounting to \$50,000,000 with the regular treatment guaranteeing 80 per cent. of the total.

Ontario led all the provinces with 14,335 loans for a total of \$5,588,000.

Explosion Causes Fire

Plant of Supply Company in Fort William Partially Destroyed

Fort William.—Proceeded by several violent explosions that shattered windows for blocks, partially destroyed the plant of the Northern Ontario Mining and Smelting Company.

Firemen beat the blaze in bitter cold that touched 22 degrees below zero, while teams of adjutants, drivers, and men to the streets that night, while we gave shelter in nearby houses. Destruction of the warehouse and stock will bring the loss to about \$150,000.

Canadians were remained undamaged. It is presumed a steam boiler blew up, causing the first explosion. The series of blasts that followed probably originated among acetylene tanks stored in the warehouse, said the owners.

Canadian Pilot Killed

Stoke-on-Trent, Stafforshire, England

Admiral Pilot Officer H. G. Christie, 30, killed in a plane accident, was killed when he crashed near here. Christie, piloting a Royal Air Force training machine, made a direct entry to the R.A.F. from Canada last year and had been stationed at Ternhill airforce.

The continued deficit was attributed to a sharp drop in expected revenue because of the business recession. Mr. Roosevelt acknowledged that for the current year he expected a deficit of \$10,000,000 for the next 12 months, which he noted would be successive declines. The public debt, he said, would reach a \$28,528,200,000 high in June 30.

The continued deficit was attributed to a sharp drop in expected revenue because of the business recession. Mr. Roosevelt acknowledged that for the current year he expected a deficit of \$10,000,000 for the next 12 months, which he noted would be successive declines. The public debt, he said, would reach a \$28,528,200,000 high in June 30.

He expressed confidence, however, 1938 would see a great improvement. Greater production would furnish a sufficient supply of necessary instruments and pilots would receive more intensive training.

CANADA HOUSE AND HIGH COMMISSIONER UNDER FIRE?

Reports from Ottawa state that the administration of Canada House in London is to be the subject of strong criticism in the House of Commons at the coming session of Parliament. Liberal members, particularly, are incensed over the lack of attention and 'scant courtesy' accorded them this year. The High Commissioner, Hon. Vincent Massey (inset) and his staff had a strenuous time during the Coronation, particularly with so many visitors from all parts of Canada, but some of the members are reported to have registered strong complaints about the accommodation and other matters.

Cost Has Been Heavy

England Pays Large Sum In Compensation For Cattle Destroyed

London.—Coincident with London's announcement a new commission of inquiry will be sent to Palestine, terrorist snipers resumed attacks on British and American traffic arteries of the Holy Land.

Unidentified assailants fired on a bus speeding along the Jerusalem-Jaffa road, killing a Jewish policeman in the bus.

British police, with troops of the Black Watch, went to the spot to search for the aggressors.

Automobiles and buses plying the Jerusalem-Jaffa road and the Haifa road under fire of British snipers.

One traveler was wounded in the Haifa zone, a bullet hit a railroad train, one was fired on British, and two British were injured.

Refusal of some wealthy residents of the Hebrew region to pay their part of a \$2,750 (\$13,750) collective tax imposed by the British government to combat terrorism has resulted in despatch of troops and armoured cars to the region to maintain order. Many of the residents left Hebrew to evade payment of the levy.

Washington.—Declaring he was influenced by world conditions over which this nation had no control, the future of which was which could not be foreseen, President Roosevelt in his 1938 budget recommended that congress allot to the national defence \$891,300,000.

The navy was given \$69,827,000 the army \$148,479,000, total \$88,300,000, and the air force \$19,000,000.

Mr. Roosevelt called for army and navy appropriations 8 per cent. higher than those of the budget five years removed—1934. Moreover, he told congress that it is necessary to add additional appropriations for national defence.

During the fiscal year, 1937, he called a military airfield on the canal at Genoa, between Port Said and Suez.

Estimated sources at London said that the plan was given \$1,000,000 to build a military airfield on the canal.

It is believed the plan was built.

Increases to the army provided principally for augmenting the personnel of the regular army, national guard and coast guard.

The importance acquired by the army air corps was seen in the fact that almost exactly one-third of the war budget was allocated to the air force by the minister of defence.

Estimated sources at London said that the plan was given \$1,000,000 to build a military airfield on the canal at Genoa, between Port Said and Suez.

DEPLORES NEW CONSTITUTION

Controlled By The Sun

Airline Buses Arranged To Operate Automatically

Winnipeg.—Donald Craig, Trans-Canada Airlines engineer, said busses controlled by the sun's rays and functioning automatically for two months without attention would be installed all over the empire.

"Each sunset has one beam and about 60 sun-ray lights," he continued. "Electricity is supplied by low-speed-pulse generators, which are fastened to the busses controlled by the sun. Daylight turns off the generators, and when night falls they start up again."

OTTAWA.—An attack on the whole plan for establishing Social Credit as illegal and an invasion of the dominion by the federal government was dismissed in the central feature of the Dominion government's case in reference to the supreme court of Canada on Alberta legislation.

Opposing this claim the Alberta government argued the federal government had no right to interfere with the powers of the lieutenant-governor of Alberta.

Factories were built in the court on behalf of the Dominion government, the Alberta government and the Alberta daily and weekly newspapers. Other factors are expected from the banks and Canadian newspapers generally.

The Dominion seeks court rulings upholding the federal power of disallowance and the lieutenant-governor's power of reservation. Alberta's other rights are to effect these powers have caused a delay.

The Dominion seeks a declaration the three bills are unconstitutional, Alberta declaring they are constitutionally valid.

The Alberta newspaper faction seeks a declaration the press bill is unconstitutional. The Canadian newspaper faction will have the same objections to the federal bill as the Alberta newspaper faction.

In its general attack on the Social Credit plan the Dominion faction relies on the power of the legislature to deal with Social Credit, legal action dealing with Social Credit leaders, including the founder of the theory, Major C. H. G. S. Mitchell, declared.

For this it claims to demand the bills before the court are "part and parcel of one legislative scheme sharing a common aim, that of acquiring control over the power of institutions which affect the economic life of the country."

Opposing this, the factum says, involves "encroachments upon the exclusive legislative authority of the Dominion parliament in relation to banking, incorporation of banks and the regulation of paper money and the regulation of paper money."

Anticipating the Dominion argument, Alberta has an answer to it in the provincial factum. It declares there is no authority under which such motions can be made.

The court had only to look at the bills before it and their expressed objectives and should not go outside them to see if they sought to deal with other matters not under provincial jurisdiction.

Even if extraneous material could ever be relevant to the reference a comprehensive inquiry would be necessary to determine its validity.

No safe conclusions could be drawn from material selected by those who were calling in question the validity of the measures.

"The validity of a provincial statute does not depend upon its purpose," the factum states. "The competence of a legislature under a given constitution cannot vary according to the nature of its intention, whether it be to bind the individuals through whom at any time the legislature will be expressed."

Frederick Walker in Italy

Venice, Italy.—Frederick Walker, breakeader left over the city's famous canals from freezing over. The cold snap in early January threatened to disrupt Venice communications in below freezing weather felt throughout northern Italy.

DEFENCE PLANS HAVE NOT YET BEEN CONSIDERED

Ottawa.—Estimates to be submitted at the session of parliament opening Jan. 22 have not been considered by the cabinet. If they are not adopted at the same time, it will be referred to the defence department to be submitted at the next session of parliament.

Defence estimates for the year totalled \$35,000,000 and a considerable proportion may be revised this year because of the inability of the government to purchase equipment. Armament plans were working to capacity all year and Canada's orders could not be filled.

It was reported in Toronto the United States had been fortifying Canadian-American border fortifications against invasion through Canadian territory, unless Canada took adequate coastal defence measures.

Canadian officials were, however, claimed to have been working beyond defending Defence Minister Mackenzie already had announced elaborate improvements to coastal fortifications at Esquimalt, Vancouver and York Island on the Pacific.

Tribute To Dr. Wheeler

Veteran Agriculturist Is Honored At Dinner At Rostherne

Dr. Seager Wheeler probably could not have been more popular in the world than Dr. E. K. Kirk, dean of the College of Agriculture at the University of Saskatchewan, at a dinner tendered to the veteran agriculturist at Rostherne.

Dr. Kirk joined citizens of Rostherne and district, and prominent men of the province in paying tribute to Dr. Wheeler at the dinner of the University of Saskatchewan. Among others attending were Mr. J. G. Taggart, minister of agriculture, and Walter A. Tucker, M.P.

Reference was made by the speaker to Dr. Wheeler's work in the development of the prairie wheat, and Dr. Wheeler had done not only in growing prize grains but in the development of various strains of grain and his horticultural experiments.

When asked what was the attitude of Dr. Wheeler to the determination of western farmers, he was convinced that westerners had not lost their morale, that in spite of the depression the country's economy would not be forced to abandon more than 10 per cent. of the cultivated land in the prairie provinces.

Visibly moved by the tributes paid to him, Dr. Wheeler replied and recounted the difficulties experienced by his family when they moved to Canada and the many well-known stories of his early grain-growing efforts.

Vanguard Oats

New Rust-Resistant Variety Has Made Greatly Improved Shelling

Winnipeg.—Vanguard, a new rust-resistant variety bred at the Rostherne rust laboratory here by Dr. C. H. Goulden, has made a remarkable showing in the last two years.

Vanguard oats, which come from a cross between Bannister and Hajira varieties, is three to four days earlier than Bannister, has fine but strong straw, lower percentage hulls on the ears, and is more moderately resistant to smut. Dr. Goulden said.

It was tested at 20 stations in Manitoba against Bannister, Anthony and Gopher varieties and topped them in the tests.

French Aviatrix Rescued

Downed In Persia And Guarded By Bedouin Tribesmen

Bafta, Iran.—Helen Givens, French aviatrix, was downed when her plane was forced down by storms in Southern Iran (Persia), reached Isfak, Isfak, early with an escort of Bedouin tribesmen after a two-day flight.

The flyer left Karachai, India, recently in continuation of an attempt to break the St. Louis-Paris record. When her plane was forced down after a two-day flight, she was sent to a camp of Bedouin tribesmen.

When she was sent to a camp of Bedouin tribesmen, she was sent to a camp of Bedouin tribesmen.

Yesterdays news from the camp of Bedouin tribesmen.

When a cold strikes . . .
don't take needless risks

Treat Colds This PROVED Way

Why experiment with Vapo-Rub? Has been doing it for you . . . proved by everyday use in thousands of cases. The medication of its kind: *further proven by the latest clinical tests on more than 100,000 cases (full details in each Vapo-Rub package).* It's the only cold remedy you such prefer.

direct external
rubbing—no risk
of stomach upset.

Simply massage the chest, back (as illustrated). You will begin to feel warm and comfort-

able as Vapo-Rub starts working directly through the skin like a warming fire. At the same time, its medicinal warmth of the body—are carried directly to the heated air-passages

of the lungs.

This double action tones

the body, relieves irritation and coughing—helps break local fever.

Repeat treatment at bedtime, before you go to bed. You will keep right on working hour after hour. Often

the word of "cold" is gone.

VICKS
VAPORUB

Now WHITE-STAINLESS

WHAT HO!

By —
RICHARD CONNELL.

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER IV—Continued

"Talking of taking turkey," said the earl, "though why turkey and not goose or grouse I can't think, I'm going to tell you how happy Mr. Bingley, and going to have the castle. It had been out of the family since it was built, except for a few times when enemies seized it, but we cracked them out in two ticks, you can depend on it, and we'll have it established that you and I both come from the same litter, I know that I am leaving the castle in safe hands."

Ernest wrestled with this statement, and was thrown. Since the earl had had but a single minute glass of claret with his lunch it was unlikely that he was drunk; but, if so, where was a very sensible man called sane? For, apparently, if words meant anything, he was now offering to give the castle to Ernest. That was what he had in mind, his president policy was to do nothing, agree to everything and be on the alert to make a dash for the door if his lordship grew violent. So he bowed, and a bow can mean much, or nothing.

"A thousand pounds?" remarked the earl, "a lot of money."

"Indeed it is," agreed Ernest, "nearly three thousand."

"A lot to me. I mean to say," went on the earl, "But I dare say to a millionaire it is only a handful of pence."

"Some rich men I suppose it is," agreed Ernest.

"Just a spot on an old weskit."

"No doubt."

"A more mouse-like."

"I do not see—"

"Now here at this historic pile, as the guide book calls it," said the earl, "Look at this room. My study they call it though I never study anything here. Or elsewhere. In this very room, I have seen the author of the love-letters which got him into handfuls of trouble; a royalist plot was hatched here; a certain light shone right where you are, and my grandfather that they went out and jumped into the moat under the impression that they were frogs. And so it goes. Every cubic inch of this old place, from the top stone on the tower to the dungeons is fruited with memory."

Ernest nodded.

"I know," said Ernest.

"Of course you do," said the earl. "Hosa tells me you certainly know your castles."

"Only this one," said Ernest.

"Well, this is the one we're talking about," said the earl. "May I pose a question?"

"Certainly, sir."

"All things considered, do you think a thousand pounds for a month's rent for the castle is too steep?"

"I most certainly do not," said Ernest.

The earl stopped his bow with a massive smile and half-closed his eyes in a sigh of relief.

"Then that's that," he said.

That was what Ernest wondered.

"We'll fix up the details later," said the earl.

Ernest nodded. The only details he could think of were returning Ralph to his native pastures and picking up his Sunday suit and spare underclothes from the Gondolier.

"Mind if I rattle a skeleton?" he heard the earl inquire.

"Not at all," said Ernest.

"I feel," said the earl, "I should explain to you Bingley to Bingley why we have to rent you the castle."

Rekt? The word stung Ernest's ears like a wasp. It conveyed to him an alarming hint as to his true position. But his stunned mind could

word had been dipped in acid and burned his throat.

"How come?" said the earl.

"I'm not what I seem to be," Ernest said.

"Nothing is," said the earl.

"I mean," said Ernest, in the same measured and tortured tones, "I have not agreed to rent the castle."

A drunken looking earl. He tried to adopt a light tone, but failed.

"Oh, I say, now," he said, "I thought it was all understood."

"I'm to blame," said Ernest. "I did not understand."

There was a knock at the study door.

"May I come in?" said Lady Rosa's voice.

She came in anyhow.

"Well, everything rosy?" she began, then seeing their faces, asked quickly, "What's the matter?"

"Everything," said the earl.

"I seem to have fuddled my shot again," said the earl, brokenly. "Mr. Bingley has changed my mind about taking the castle."

She turned toward Ernest.

"Have you?" she said.

Ernest looked back at her, saw her distressed eyes.

"Will you give me a moment to think?" he said, huskily.

"Certainly."

He walked to the window and faced the Earl of Bingley and his daughter.

"Will you leave us alone?" he said, "Lady Rosa Bingley say."

"No. Please stay."

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

"You're quite sure you want to?" asked Rosa.

"I want to do nothing more in my life," said Ernest. "It's all I have to do."

"It's a bargain," said Ernest.

"I'll take your word for it," said the Earl of Bingley.

"I'll stay."

TRANSFORMING FRIENDSHIP

(By Rev. W.H. McDonald)

We must begin, as was said last week, to practice the presence of God by acts of imaginative faith. We must let our mind and heart accept the idea that God is present through His life as we practice our own life and convinced that He is interested and concerned or even involved in all that we do and say and think.

After this initial leap of an imaginative leap of faith in Jesus Christ, In Him you have something real and correct. His life was lived in the service of all men, and this is true to all lives of men. We do not know all we would like to know, especially about the years of His life and training, but we do know that He is trustworthy. His life is a central fact amid all the other facts more or less important which we do not know.

Also, we must keep in mind that interpretation of facts is a necessity. What interpretation do you lay upon the fact of a life like Jesus? Do you interpret it as a life of power and wisdom of God?

It is interesting to remember that the disciples were irritable on Jesus behalf e.g. "Send the tax collector away" and the like. They were irritated, but Jesus was not irritated, "We are with you, we are with you, we are with you."

Now we must find Jesus for ourselves. It will not take much of a

leap to begin to do that but it will take all of you there is. Jesus carried His friends beyond the need of the senses, and convinced them against all their expected positions and attitudes. To do this life of Christ loose into our world. This life of Jesus is but the life of God expressed in ways we least can understand in one who is called "the Son of God" and "the 'Son of God' who sojourned in the crowded huts and hearts of man long ago and even until now.

A little girl was sitting in church watching a little girl and suddenly exclaimed, "Look, the lady has the lady changed her mind!"

"What do you mean?" the mother asked.

"Do you like short skirts, Mike?"

"Now, they get lipstick on me short when I dance with them."

"Was I fast?" Iissen guy, when I

hit the plants, every time I

hit one of my home runs, I

hit the plants again."

He has never been forced into

trouble or into difficulty, "we are

with you, we are with you."

Now we must find Jesus for ourselves. It will not take much of a

leap to begin to do that but it will

take all of you there is. Jesus carried

His friends beyond the need of the

senses, and
